

## GWG 19.1 – DeviceN Overprint (Yellow)

Vector

Cross: Cyan (DeviceN - 100C)

Overprinting: 0C0M100Y0K

Reference: 100C0M100Y0K (Green)

Image

Vector

Cross: Cyan (DeviceN - 100C0Y)

Overprinting: 0C0M100Y0K

Reference: 100C0M0Y0K

Image

a + b: must be rendered to solid Green rectangles

Cyan X means, that OP is not honored (or image was converted to DeviceCMYK for b)

c + d: must be rendered to solid Cyan rectangles

c: X means, that color space might have been converted to DeviceCMYK upfront (OPM 1)

d: colored X means, that 0% Channels might have been ignored or color was converted
